🎓 ACADEMIC QUALIFICATION

George Mason University, *Master of Science in Computer Science* 08/2025 – Present | Fairfax, Virginia, USA
Sri Sairam Engineering College, *Bachelor of Engineering in Computer Science* 11/2020 – 05/2024 | Chennai, Tamilnadu, India
CGPA: 8.95/10.00

💼 WORK EXPERIENCE

Ford Motor Pvt Ltd, *Junior Engineer* 07/2024 – 06/2025 | Chennai

- Designed, implemented, and supported **serverless solutions (Cloud Run, Cloud Functions, Eventarc)** on GCP.
- Developed **Terraform modules** to automate provisioning of GCP resources.
- Built **Python automation** for secret rotation compliance, strengthening security posture.
- Re-architected a Cloud Run shutdown app** with zero downtime and integrated **Fossa, SonarQube, Checkmarx** for automated vulnerability/license compliance.
- Enhanced **shutdown automation platform (Go, JS, PostgreSQL)** with multi-service concurrency, **saving ~\$2000/week** and improving operational efficiency.

Ford Motor Pvt Ltd, *Software Engineer Intern* 01/2024 – 07/2024 | Chennai

- Trained in Google cloud platform and its various services
- Participating in Proof of Concept (POC) on serverless service's new features, and make them available to customers
- Worked with Cloud Run, Cloud Functions, and Event Arc

🔧 TECHNICAL SKILLS

Programming languages: C, Python, Java, JavaScript, Go, Terraform

Web Frameworks: HTML, CSS

Database: MySQL, PostgreSQL, Redis, MongoDB

Cloud & Devops: GCP, Docker, Tekton

BPM Tool: PEGA

🏆 AWARDS & ACHIEVEMENTS

KLUG KODERS 2.0: Innovative Design Project Exhibition 2023
Secured 2nd place in "KLUG KODERS 2.0: Innovative Design Project Exhibition," organized by the CSE Department.

Inspirational Star Award
Received the "Inspirational Star Award" for academic excellence (2021–2024), issued by the Department of Computer Science and Engineering, Sri Sairam Engineering College.

📁 ACADEMIC PROJECTS

Leave Management Portal, *Team size: 2*
Summary: The Leave Management Portal is an internet-based application designed for college-wide access. It manages leave-related information and facilitates the approval process for both faculty and students. The system was developed using HTML, CSS, PHP, and MySQL.

Canteen Automation Foodzzoi, *Team size: 2*
Summary: The Canteen Automation System, developed using Pega technology, streamlines canteen operations through cashless transactions and real-time inventory management. It allows students to use UPI, card, and net banking for purchases, while the institution efficiently tracks inventory levels to minimize waste and optimize costs. This system enhances productivity, reduces administrative tasks, and provides a seamless experience for students.
